

Energy performance certificate (EPC)

| | | | |
|---|---------------|---------------------|--------------------------|
| 4, Poplars Avenue Hanwood SHREWSBURY SY5 8RD | Energy rating | Valid until: | 26 June 2024 |
| | E | Certificate number: | 2138-5019-7256-2244-9950 |

| | |
|------------------|-------------------|
| Property type | Detached house |
| Total floor area | 134 square metres |

Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read [guidance for landlords on the regulations and exemptions \(https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance\)](https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is E. It has the potential to be C.

[See how to improve this property's energy efficiency.](#)

| Score | Energy rating | Current | Potential |
|-------|---------------|---------|-----------|
| 92+ | A | | |
| 81-91 | B | | |
| 69-80 | C | | 80 C |
| 55-68 | D | | |
| 39-54 | E | 51 E | |
| 21-38 | F | | |
| 1-20 | G | | |

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature | Description | Rating |
|----------------------|---|-----------|
| Wall | Cavity wall, as built, partial insulation (assumed) | Average |
| Roof | Pitched, 75 mm loft insulation | Average |
| Roof | Pitched, limited insulation (assumed) | Poor |
| Window | Fully double glazed | Average |
| Main heating | Boiler and radiators, mains gas | Good |
| Main heating control | No time or thermostatic control of room temperature | Very poor |
| Hot water | From main system | Good |
| Lighting | Low energy lighting in 39% of fixed outlets | Average |
| Floor | Solid, no insulation (assumed) | N/A |
| Secondary heating | Room heaters, electric | N/A |

Primary energy use

The primary energy use for this property per year is 279 kilowatt hours per square metre (kWh/m²).

▶ [About primary energy use](#)

Additional information

Additional information about this property:

- Cavity fill is recommended

How this affects your energy bills

An average household would need to spend **£1,609 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £740 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2014** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 19,487 kWh per year for heating
- 2,700 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is E. It has the potential to be C.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO₂) they produce each year.

Carbon emissions

| | |
|---|-------------------|
| An average household produces | 6 tonnes of CO2 |
| This property produces | 7.1 tonnes of CO2 |
| This property's potential production | 2.6 tonnes of CO2 |

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Changes you could make

▶ [Do I need to follow these steps in order?](#)

Step 1: Increase loft insulation to 270 mm

| | |
|--|-------------|
| Typical installation cost | £100 - £350 |
| Typical yearly saving | £58 |
| Potential rating after completing step 1 | 52 E |

Step 2: Cavity wall insulation

| | |
|---|---------------|
| Typical installation cost | £500 - £1,500 |
| Typical yearly saving | £243 |
| Potential rating after completing steps 1 and 2 | 60 D |

Step 3: Floor insulation

| | |
|--|---------------|
| Typical installation cost | £800 - £1,200 |
| Typical yearly saving | £128 |
| Potential rating after completing steps 1 to 3 | 64 D |

Step 4: Low energy lighting

| | |
|--|-------------|
| Typical installation cost | £55 |
| Typical yearly saving | £33 |
| Potential rating after completing steps 1 to 4 | 65 D |

Step 5: Heating controls (programmer, room thermostat and TRVs)

Heating controls (programmer, thermostat, TRVs)

| | |
|--|-------------|
| Typical installation cost | £350 - £450 |
| Typical yearly saving | £153 |
| Potential rating after completing steps 1 to 5 | 69 C |

Step 6: Replace boiler with new condensing boiler

| | |
|---------------------------|-----------------|
| Typical installation cost | £2,200 - £3,000 |
|---------------------------|-----------------|

Typical yearly saving

£87

Potential rating after completing steps 1 to 672 C

Step 7: Solar water heating

Typical installation cost

£4,000 - £6,000

Typical yearly saving

£38

Potential rating after completing steps 1 to 773 C

Step 8: Solar photovoltaic panels, 2.5 kWp

Typical installation cost

£9,000 - £14,000

Typical yearly saving

£241

Potential rating after completing steps 1 to 880 C

Help paying for energy improvements

You might be able to get a grant from the [Boiler Upgrade Scheme \(https://www.gov.uk/apply-boiler-upgrade-scheme\)](https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

Assessor's name

Callum Whyte

Telephone

0116 236 6523

Emailepcquery@markgroup.co.uk

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

Accreditation scheme

Elmhurst Energy Systems Ltd

Assessor's ID

EES/011496

Telephone

01455 883 250

Emailenquiries@elmhurstenergy.co.uk

About this assessment

| | |
|------------------------|-------------------------|
| Assessor's declaration | No related party |
| Date of assessment | 27 June 2014 |
| Date of certificate | 27 June 2014 |
| Type of assessment | ▶ RdSAP |

Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at dluhc.digital-services@levellingup.gov.uk or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).

There are no related certificates for this property.
