Energy performance certificate (EPC)

| Property type | | Semi-detach | ned house |
|---|---------------|------------------------|--------------------------|
| OX44 7LP | E | Certificate number: | 0887-3029-4208-6207-2200 |
| 2 Standhill Cottage Little Haseley OXFORD | Energy rating | Valid until: | 7 August 2033 |

Total floor area

107 square metres

Rules on letting this property

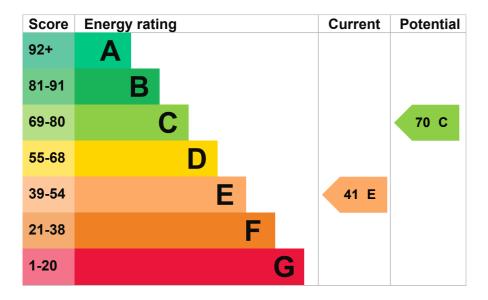

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

Energy rating and score

This property's energy rating is E. It has the potential to be C.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- · the average energy rating is D
- the average energy score is 60

Breakdown of property's energy performance

Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature | Description | Rating |
|----------------------|--|-----------|
| Wall | Solid brick, as built, no insulation (assumed) | Very poor |
| Wall | Cavity wall, as built, no insulation (assumed) | Poor |
| Roof | Pitched, 270 mm loft insulation | Good |
| Roof | Pitched, no insulation (assumed) | Very poor |
| Window | Fully double glazed | Good |
| Main heating | Boiler and radiators, oil | Average |
| Main heating control | Programmer, TRVs and bypass | Average |
| Hot water | From main system | Average |
| Lighting | Low energy lighting in 35% of fixed outlets | Average |
| Floor | Solid, no insulation (assumed) | N/A |
| Floor | Suspended, no insulation (assumed) | N/A |
| Secondary heating | Room heaters, wood logs | N/A |

Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

· Biomass secondary heating

Primary energy use

The primary energy use for this property per year is 284 kilowatt hours per square metre (kWh/m2).

About primary energy use

Additional information

Additional information about this property:

· Cavity fill is recommended

How this affects your energy bills

An average household would need to spend £2,272 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £783 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2023** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

Heating this property

Estimated energy needed in this property is:

- 15,761 kWh per year for heating
- 3,320 kWh per year for hot water

Impact on the environment

This property's environmental impact rating is F. It has the potential to be D.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year.

Carbon emissions

| An average household produces | 6 tonnes of CO2 |
|--------------------------------------|-------------------|
| This property produces | 7.3 tonnes of CO2 |
| This property's potential production | 3.7 tonnes of CO2 |

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

Changes you could make

Do I need to follow these steps in order?

Step 1: Cavity wall insulation

| Typical installation cost | £500 - £1,500 |
|--|---------------|
| Typical yearly saving | £175 |
| Potential rating after completing step 1 | 45 E |

Step 2: Internal or external wall insulation

| Typical installation cost | £4,000 - £14,000 |
|---|------------------|
| Typical yearly saving | £220 |
| Potential rating after completing steps 1 and 2 | 51 E |

Step 3: Floor insulation (solid floor)

| Typical installation cost | £4,000 - £6,000 |
|--|-----------------|
| Typical yearly saving | £79 |
| Potential rating after completing steps 1 to 3 | 53 E |

Step 4: Hot water cylinder insulation

Add additional 80 mm jacket to hot water cylinder

| Typical installation cost | £15 - £30 |
|--|-----------|
| Typical yearly saving | £35 |
| Potential rating after completing steps 1 to 4 | 54 E |

Step 5: Low energy lighting

| Typical installation cost | £65 |
|--|------|
| Typical yearly saving | £90 |
| Potential rating after completing steps 1 to 5 | 56 D |

Step 6: Heating controls (room thermostat)

Typical installation cost

£350 - £450

| Typical yearly saving | £97 |
|--|------|
| Potential rating after completing steps 1 to 6 | 58 D |
| | |

Step 7: Solar water heating

| Typical installation cost | £4,000 - £6,000 |
|--|-----------------|
| Typical yearly saving | £87 |
| Potential rating after completing steps 1 to 7 | 61 D |

Step 8: Solar photovoltaic panels, 2.5 kWp

| Typical installation cost | £3,500 - £5,500 |
|--|-----------------|
| Typical yearly saving | £680 |
| Potential rating after completing steps 1 to 8 | 70 C |

Help paying for energy improvements

You might be able to get a grant from the Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme). This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | David Mercer |
|-----------------|-------------------------------------|
| Telephone | 01495 234 300 |
| Email | epcquery@vibrantenergymatters.co.uk |

Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| Accreditation scheme | Elmhurst Energy Systems Ltd |
|----------------------|--------------------------------|
| Assessor's ID | EES/027533 |
| Telephone | 01455 883 250 |
| Email | enquiries@elmhurstenergy.co.uk |

About this assessment

| Assessor's declaration | No related party |
|------------------------|------------------|
| Date of assessment | 8 August 2023 |
| Date of certificate | 8 August 2023 |
| Type of assessment | ► <u>RdSAP</u> |

Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at <u>dluhc.digital-services@levellingup.gov.uk</u> or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).
