# Energy performance certificate (EPC)

Ty Nant
South Stack
HOLYHEAD
LL65 1YH

Energy rating

Valid until: 10 May 2026

Certificate 9108-0009-7255-4646-5940 number:

## **Property type**

**Detached house** 

## **Total floor area**

119 square metres

#### Rules on letting this property

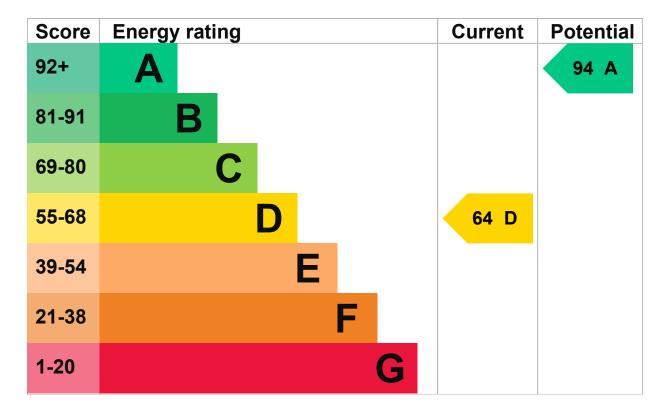

Properties can be let if they have an energy rating from A to E.

You can read guidance for landlords on the regulations and exemptions (https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance).

#### **Energy rating and score**

This property's current energy rating is D. It has the potential to be A.

See how to improve this property's energy efficiency.

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

- the average energy rating is D
- the average energy score is 60

## Breakdown of property's energy performance

# Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

Feature	Description	Rating
Wall	Granite or whinstone, with internal insulation	Good
Wall	Cavity wall, as built, insulated (assumed)	Very good
Roof	Pitched, 300 mm loft insulation	Very good
Roof	Pitched, insulated (assumed)	Good
Window	Fully double glazed	Good
Main heating	Ground source heat pump, underfloor, electric	Average
Main heating control	Time and temperature zone control	Very good

Feature	Description	Rating
Hot water	From main system, no cylinder thermostat	Very poor
Lighting	Low energy lighting in all fixed outlets	Very good
Floor	Solid, insulated	N/A
Floor	Solid, insulated (assumed)	N/A
Secondary heating	Portable electric heaters (assumed)	N/A

# Low and zero carbon energy sources

Low and zero carbon energy sources release very little or no CO2. Installing these sources may help reduce energy bills as well as cutting carbon emissions. The following low or zero carbon energy sources are installed in this property:

Ground source heat pump

# Primary energy use

The primary energy use for this property per year is 193 kilowatt hours per square metre (kWh/m2).

About primary energy use

## How this affects your energy bills

An average household would need to spend £1,143 per year on heating, hot water and lighting in this property. These costs usually make up the majority of your energy bills.

You could save £147 per year if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2016** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

# Heating this property

Estimated energy needed in this property is:

- 9,678 kWh per year for heating
- 3,621 kWh per year for hot water

#### Impact on the environment

This property's current environmental impact rating is D. It has the potential to be A.

Properties get a rating from A (best) to G (worst) on how much carbon dioxide (CO2) they produce each year. CO2 harms the environment.

# **Carbon emissions**

# An average household produces

# This property produces

3.9 tonnes of CO2

# This property's potential production

0.5 tonnes of CO2

You could improve this property's CO2 emissions by making the suggested changes. This will help to protect the environment.

These ratings are based on assumptions about average occupancy and energy use. People living at the property may use different amounts of energy.

▶ Do I need to follow these steps in order?

# Step 1: Hot water cylinder thermostat

<b>Typical</b>	instal	lation	cost
.,			

£200 - £400

Typical yearly saving

£33

Potential rating after completing step 1

65 D

# Step 2: Solar water heating

**Typical installation cost** 

£4,000 - £6,000

Typical yearly saving

£84

Potential rating after completing steps 1 and 2

68 D

# **Step 3: High performance external doors**

Typical installation cost

£1,500

Typical yearly saving

£31

Potential rating after completing steps 1 to 3

69 C

# Step 4: Solar photovoltaic panels, 2.5 kWp

## Typical installation cost

£5,000 - £8,000

## Typical yearly saving

£299

## Potential rating after completing steps 1 to 4

77 C

# Step 5: Wind turbine

## Typical installation cost

£15,000 - £25,000

## Typical yearly saving

£548

## Potential rating after completing steps 1 to 5

94 A

# Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

Who to contact about this certificate

# Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

#### Assessor's name

Peter Roberts

## **Telephone**

#### **Email**

admin@kimberleygulf.co.uk

# Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

#### Accreditation scheme

Elmhurst Energy Systems Ltd

## Assessor's ID

EES/002590

## **Telephone**

01455 883 250

#### **Email**

enquiries@elmhurstenergy.co.uk

## About this assessment

## Assessor's declaration

No related party

#### Date of assessment

10 May 2016

## Date of certificate

11 May 2016

## Type of assessment

**RdSAP** 

#### Other certificates for this property

If you are aware of previous certificates for this property and they are not listed here, please contact us at <a href="mailto:dluhc.digital-services@levellingup.gov.uk">dluhc.digital-services@levellingup.gov.uk</a> or call our helpdesk on 020 3829 0748 (Monday to Friday, 9am to 5pm).
