| Property type   | n             | Mid-terrace bunga      | alow                         |
| Total floor area  | e             | 60 square metres       |                              |

## Rules on letting this property

Properties can be let if they have an energy rating from A to E.

You can read <u>guidance for landlords on the regulations and exemptions</u> (<u>https://www.gov.uk/guidance/domestic-private-rented-property-minimum-energy-efficiency-standard-landlord-guidance</u>).

## Energy rating and score

This property's energy rating is D. It has the potential to be B.

<u>See how to improve this property's energy</u> <u>efficiency</u>.

| Score | Energy rating | Current | Potential |
|-------|---------------|---------|-----------|
| 92+   | Α             |         |           |
| 81-91 | B             |         | 88 B      |
| 69-80 | С             |         |           |
| 55-68 | D             | 60 D    |           |
| 39-54 | E             |         |           |
| 21-38 | F             |         |           |
| 1-20  |               | G       |           |

The graph shows this property's current and potential energy rating.

Properties get a rating from A (best) to G (worst) and a score. The better the rating and score, the lower your energy bills are likely to be.

For properties in England and Wales:

the average energy rating is D the average energy score is 60

## Breakdown of property's energy performance

#### Features in this property

Features get a rating from very good to very poor, based on how energy efficient they are. Ratings are not based on how well features work or their condition.

Assumed ratings are based on the property's age and type. They are used for features the assessor could not inspect.

| Feature              | Description   | Rating    |
|----------------------|---|-----------|
| Wall                 | Cavity wall, as built, partial insulation (assumed) | Average   |
| Roof                 | Pitched, 300+ mm loft insulation                    | Very good |
| Window               | Fully double glazed                                 | Average   |
| Main heating         | Boiler and radiators, mains gas                     | Good      |
| Main heating control | Programmer, room thermostat and TRVs                | Good      |
| Hot water            | From main system                                    | Average   |
| Lighting             | Low energy lighting in 50% of fixed outlets         | Good      |
| Floor                | Suspended, no insulation (assumed)                  | N/A       |
| Secondary heating    | Room heaters, electric                              | N/A       |

#### Primary energy use

The primary energy use for this property per year is 255 kilowatt hours per square metre (kWh/m2).

#### Additional information

Additional information about this property:

- Cavity fill is recommended
- · Dwelling has access issues for cavity wall insulation
- Dwelling may be exposed to wind-driven rain

## How this affects your energy bills

An average household would need to spend **£753 per year on heating, hot water and lighting** in this property. These costs usually make up the majority of your energy bills.

You could **save £276 per year** if you complete the suggested steps for improving this property's energy rating.

This is **based on average costs in 2014** when this EPC was created. People living at the property may use different amounts of energy for heating, hot water and lighting.

#### Heating this property

Estimated energy needed in this property is:

- 5,644 kWh per year for heating
- 2,557 kWh per year for hot water

| Impact on the envir   | onment          | This property produces  | 2.9 tonnes of CO2     |
|---|-----------------|---|-----------------------|
| This property's environmental impact rating is D. It has the potential to be B.                                   |                 | This property's potential production  | 0.6 tonnes of CO2     |
| Properties get a rating from A (best) to G<br>(worst) on how much carbon dioxide (CO2)<br>they produce each year. |                 | You could improve this property's CO2<br>emissions by making the suggested changes.<br>This will help to protect the environment. |                       |
| Carbon emissions  |                 | These ratings are based of about average occupancy  | / and energy use.     |
| An average household<br>produces  | 6 tonnes of CO2 | People living at the property may use diffe amounts of energy.  | rty may use different |

## Changes you could make

| Step                      | Typical installation cost | Typical yearly saving |
|---------------------------|---------------------------|-----------------------|
| 1. Cavity wall insulation | £500 - £1,500             | £40                   |
| 2. Floor insulation       | £800 - £1,200             | £67                   |
| 3. Low energy lighting    | £15                       | £16                   |
| 4. Condensing boiler      | £2,200 - £3,000           | £117                  |
| 5. Solar water heating    | £4,000 - £6,000           | £38                   |

| Step                         | Typical installation cost | Typical yearly saving |
|------------------------------|---------------------------|-----------------------|
| 6. Solar photovoltaic panels | £9,000 - £14,000          | £266                  |
| 7. Wind turbine              | £1,500 - £4,000           | £21                   |

#### Help paying for energy improvements

You might be able to get a grant from the <u>Boiler Upgrade Scheme (https://www.gov.uk/apply-boiler-upgrade-scheme)</u>. This will help you buy a more efficient, low carbon heating system for this property.

## Who to contact about this certificate

#### Contacting the assessor

If you're unhappy about your property's energy assessment or certificate, you can complain to the assessor who created it.

| Assessor's name | Gary Langdale                |
|-----------------|------------------------------|
| Telephone       | 01934 644062                 |
| Email           | gary@a1-homeinspectors.co.uk |

#### Contacting the accreditation scheme

If you're still unhappy after contacting the assessor, you should contact the assessor's accreditation scheme.

| Accreditation scheme | NHER                           |
|----------------------|--------------------------------|
| Assessor's ID        | NHER002981                     |
| Telephone            | 01455 883 250                  |
| Email                | enquiries@elmhurstenergy.co.uk |

#### About this assessment

| Assessor's declaration | No related party |  |
|------------------------|------------------|--|
| Date of assessment     | 7 October 2014   |  |
| Date of certificate    | 7 October 2014   |  |
